

MakeltEasy – Company description

In the fast paced digital world we live in, every company truly needs an online representation in order to be found and succeed.

With google searches and social media being a fundamental part in how the customers find their next restaurant, massage pallor, art seller or any other business of interest, it is of vital importance to have an online representation – a website.

MakeltEasy is a company dedicated to the everyday businesses in our day to day life, and we know that it is much easier to concentrate on what you love doing, while letting us concentrate on creating your website.

MakeltEasy's main target group and focus are small businesses who might lack the technical knowhow to create their own websites, the goal is to create and continuously service their website at minimum cost.
